

Streamlined mailing process

Full page scanning

7" colour touchscreen

# Your Mailing Assistant

## Automate your document processing with an intuitive, flexible folder-inserter

Companies are always looking for more efficient, productive and secure ways of streamlining the processing of their business-critical communications. Ideally suited for businesses that are searching for a solution to automate a wide variety of document sizes and types, the DS-64i folder-inserter will meet all company communication needs with ease.

The DS-64i comes with standard full page barcode reading capabilities to ensure increased customer security and a professional appearance for variable-page jobs. With multiple feeder options, the DS-64i offers optimal flexibility and convenience when processing documents and filling envelopes.

## Accurately Personalised Mailing

As a connected machine, the DS-64i incorporates Quadiant's Output Management Software, which brings an added value in communication accuracy, splitting jobs between physical and digital mail and incorporating inserts to selected audiences to further target existing or potential customers. OMS works seamlessly with the DS-64i to optimise your outbound document workflow, giving your customers a professional presentation of their documents.

## Expand Your Mailing Process

To adapt to changing needs, DS-64i offers scalability through our Premium Package upgrade. With the Premium Package, you will enjoy increased envelope speed, folding capacity, monthly volume and multisheet capacity per feeder. Your DS-64i can be upgraded at any time.

## Automated Online Reporting

The DS-64i is a fully connected machine, allowing the system to upload key usage information to your NeoStats reporting. Featuring detailed analysis such as daily trends, envelope content count, secure/barcoded mailing usage and mailing details you'll have the necessary information to control and improve your outbound communications.

## Barcode Intelligence

Quadiant's exclusive CIS scanning device is able to read different types of barcodes, including BCR 1D & 2D, OMR and OCR; regardless of their location on the page. CIS ensures that all multi-page jobs will be joined together in the correct order and sent to the correct addressee, giving increased communication security.

# DS-64i

**1. High-Capacity Vertical Stacker**  
Able to hold up to 325 envelopes, the vertical stacker guarantees easy envelop unloading and print order preservation for all jobs.

**2. Touchscreen Display**  
The DS-64i's easy to use 7-inch touchscreen and interface make machine operation simple and intuitive.

**3. CIS Scanning**  
Full page scanning capabilities with the ability to read BCR 1D & 2D, OMR and OCR provides added security and ensures correct page order for all enclosed documents.

**4. Feeders**  
Different feeder configurations with a special short tray and maxi feeder for inserts provides an increased production speed and capacity.

## Business Impact

### Revenue Growth

Maximise your customer relations by personalising your communications

### Customer Engagement

Target specific audiences with inserts to expand 1:1 customer engagement

### Risk Mitigation

Avoid sending documents to the wrong person

### Expense Control

Increase speed and reduce operating costs through automation
