

SECURITY AUDIT CERTIFICATE

This certificate is proof of a successful penetration test ordered by company **Quadient, Inc.** and conducted by the company **AEC a.s.**

The main subject of the penetration test is an assessment of the **WTS API, Web and Mobile Applications** concerning reliability and ensuring the integrity, authentication, and confidentiality of data. The penetration test represents the verification of the degree of resistance of an application against an attack. Our application inspections are mainly derived from the vast experience of our team of specialists, acknowledged methodologies (including OWASP, OSSTMM among others), “BEST PRACTICES”. **WTS API, Web and Mobile Applications** were subjected to full OWASP testing and were found resistant to all known attacks.

Based on the findings, AEC states that application:

WTS API, Web and Mobile Applications

**has successfully passed the test
and no significant vulnerabilities were found.**
