

M23 & S13 Lockers

Maximize your space with towers specially sized for smaller spaces and multiple small items

Parcel Pending's M23 and S13 locker systems are designed and engineered specifically for delivery of smaller items to your residents. Whether part of an indoor or outdoor system, the M23 or S13 helps you maximize your available space.

Why choose the M23 or S13 Locker?

- Maximizes the number of lockers for use by residents and prospective residents
- Identical operation to existing lockers with a narrower locker width and tower footprint
- Easily fits smaller packages especially poly bags
- Ideal for small items including keys, leasing documents, etc.

S13 & M23 must be configured with a controller tower (either D6 or D13) and may be configured with additional towers as well.

Versatile

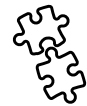

M23 has 23 doors* in a half-wide tower to provide more lockers per square foot

S13 has 13 doors in a single tower for additional lockers that fit in a small space

Secure

Includes photo capture and optional cloud-based video surveillance.

Advanced

Flexible API allows seamless integration with your property management software system.

Durable and Strong

Double-reinforced powder-coated steel construction.

Accessible

ADA-compliant, creating easy access for all residents.

Customizable

Custom wraps match property aesthetics or branding.
