Inspire Flex

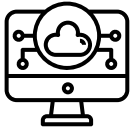

Hosted

QMS for Inspire Flex

Quadiant offers solutions for every deployment option based on your business objectives and technology preferences, including support for on-premise, SaaS cloud, hybrid, and hosted managed services. And because the Inspire portfolio of solutions is fully integrated, you can adapt your implementation at any time as your requirements change.

Deployment options overview:

INSPIRE EVOLVE

A 100% SaaS, cloud-based offering, Inspire Evolve is designed for organizations that need a high speed, high volume CCM solution that deploys quickly and easily, with minimal IT strain. Evolve empowers non-technical business users, such as customer service reps. and sales agents, to safely personalize and send multichannel communications on-demand and batch. Businesses that wish to enable line of business teams to generate customer correspondence in real-time, choose Evolve.

INSPIRE FLEX

A CCM powerhouse, Inspire Flex is for businesses with complex, enterprise-level requirements for data integration, document assembly, volume, and high-speed processing. Businesses operating in regulated industries with high volumes and highly variable communications, choose Flex. Flex can be deployed as an on-premise software installation, or as a private, public, or hybrid cloud configuration.

QMS FOR INSPIRE FLEX

Quadient Managed Services (QMS) for Inspire Flex lets organizations do more with less by outsourcing CCM operations. Deployed in a dedicated instance in the cloud, the sophistication of Flex is combined with SaaS-like simplicity. Businesses choose QMS when they want our experts to take on the heavy lifting, including migrations, updates, and lifecycle application maintenance. QMS lets you get to value quicker and frees your IT teams by putting full application management into the hands of certified Quadient professionals.

Key Benefits:

- **Supports evolving needs:**
Rather than locking you into a specific architecture with strict limitations and rigid structures, Inspire allows you to easily migrate to different deployment options. This eliminates the need to change vendors down the road, saving you time and money.
- **Maximizes CCM investment:**
The needs of your business today do not reflect those of 5-10 years from now. Inspire ensures you're investing in a future-proof architecture that grows with your business and sustains long-term success by allowing you to scale performance when and how you need.
- **Lowers operational costs:**
Reduce costs by bundling hosting, storage, hardware, and maintenance fees into a subscription license that's directly tied to usage and creates predictable costs.

UNMATCHED SCALABILITY AT EVERY STAGE

Any-premise deployment gives you the freedom to leverage the most viable solution today without committing to an architecture that may not meet your needs tomorrow. As you evaluate options, choose a CCM provider that gives you flexibility, and has a track record of implementing powerful CCM platforms in a variety of server-based and cloud-based environments.
