/ **GAIN CONTROL** of Campus Package Deliveries

Package volumes are spiking as students order everything online – school supplies, clothing, toiletries and snacks. Students expect 24/7 access and convenience to parcel pickup, like all their other on-demand services. At the same time, colleges and universities are competing for enrollment and seeking to offer more services to attract students, yet budgets are constrained and mail services must do more with less.

Drive Efficiency in Package Handling

Parcel Pending by Quadient offers smart locker solutions that automates the package pick-up process. The lockers offer 24/7 convenience to students with text or email notification once their package is ready for collection.

With the growing number of smaller, envelope style deliveries, Parcel Pending by Quadient offers a variety of locker sizes and flexible configurations to accommodate more small boxes within the same footprint. Front loading or rear loading options are available to meet your specific layout requirements. Refrigeration options support medicine or other fragile

| Rear Loading | 23 Box Tower | 13 Box Tower | Refrigerated |

Automated Assistance

Parcel Pending lockers are uniquely equipped with sensors to identify when lockers are full or to identify if a parcel is left behind. A simple rear-load load process helps guarantees chain of custody by scanning both the parcel and the box location to ensure the correct location inside the locker is recorded for each parcel. The Rear loading solution includes a web responsive app for a seamless loading experience through any mobile/tablet/PDA camera.

Enhance the Student Experience

Smart locker solutions can be extended to support a variety of student and staff activities - in a central location or distributed throughout the campus.

- Exchange point for package management and delivery

- Bookstore merchandise

- School Events

- Class and IT equipment repair and collection

- Moving materials

- Food Pantry

WTS
web tracking system

by Quadient

Web Tracking System (WTS)

Get full visibility into your internal delivery process by integrating with your existing university mail tracking system(s) or leverage our proprietary Web Tracking System (WTS). WTS is a cloud-based solution that tracks parcels and other important mail in real-time from receipt and transit, all the way to the final delivery to the end recipient.

Parcel Pending by Quadient has been a trusted smart locker solution provider to leading companies since 2013.

- **200**+ Higher Education customers, **18,000 lockers** deployed globally

- A mature, stable industry leader, Euronext Exchange (QDT)

- Continuous investment in **intelligent, value-added solutions** that drive innovation

Quadient's Sustainable Design and Responsible Manufacturing policy aims at improving energy efficiency, longevity, recyclability, modularity, upgradability, and reducing the use of hazardous substances to minimize environmental impact throughout the product life cycle.
