### What is the NeoFunds interest rate?

Any interest charge on your account is at **18.3% APR**, calculated monthly from the date that any machine re-credits occurred during your billing period.

### Example:

If you credited £100 to your machine on the 15th and we don't receive the full payment by the 'Payment Due Date', **18.3% APR** interest will be added to the £100 from the 15th onwards, calculated and applied **monthly**. (1.53% per month variable).

Until you pay the 'Total Balance Due', these interest charges will be part of the 'Opening Balance' on any future invoice/statements. Interest will be applied in the same way to **each machine re-credit** that occurred during the Billing Period.
